

Infoblox will discontinue providing support for DNSone® 2.5 software on December 31, 2006. After December 31, 2006, Infoblox will no longer provide bug fixes, patches, or maintenance releases for the NIOS™ 2.5 release.

Upgrade path

Customers with a DNSone Model 1000 or Infoblox-1000 appliance and a current support contract may upgrade to a new release of DNSone or NIOS software. As of June 30, 2006, supported upgrades for DNSone 2.5 are DNSone 3.1 and DNSone 3.2. DNSone 2.5 is the last software release that supports older hardware platforms (aka "Black Boxes") and customers that want to migrate to newer versions of DNSone or NIOS software will need to replace older hardware with current platforms.
