

2005-July-1

This announcement is provided as an update on the End of Life for RADIUSone 1.1 software release. This release has been made obsolete by subsequent software releases for the RADIUSone appliances.

End of Service

Infoblox RADIUSone version 1.1 will reach End of Service on 2005-September-30, in accordance with standard Infoblox software End of Life policy. Infoblox will continue to provide maintenance releases for Infoblox recognized bugs or security vulnerabilities which it has determined to be a significant security risk to the customer base until this date. The final maintenance release will remain available for download from the Infoblox support site for a minimum of 90 days following the End of Service date.

Upgrade path

Customers may upgrade to a more recent version of RADIUSone for their platform, including the latest version of Infoblox RADIUSone software, version 1.3.

Customers with active Infoblox maintenance programs that include software updates may upgrade as part of their maintenance program. For other customers, please see your Infoblox reseller for details and pricing for maintenance in order to obtain upgrades and support.

For more information

For release dates and milestones on all currently supported Infoblox RADIUSone releases, please refer to the "Infoblox Software Release Dates and Milestones" product announcement.
